

INTERIOR CONCEPTS **Traveler Mobile Desk**

Work wherever you want.

Traveler is the latest Interior Concepts innovation — a battery-powered mobile furniture line that creates more freedom in any work environment. Unlike most mobile desks, Traveler fully embraces and complements the modern wireless environment. With a built-in battery powerful enough to run a laptop for an entire workweek, and recharge quickly overnight, there's never a need to stay within reach of an electrical outlet. No wires, no cords, no cables. Each battery has a 7-10 year lifespan, at which point it can be safely recycled. Traveler is made of non-hazardous materials and is UL-approved. Optional plug-in power is also available.
