WE ARE YOUR BEST STUDENT

Ask us a question and we will provide thoughtful answers. Put us on a team and we will work with all members. Give us homework and we will finish it. Bring us a problem and we will deliver solutions. At Interior Concepts, it’s what we do.

For more than 25 years, Interior Concepts has partnered with schools — listening and working to design environments that fit the needs of teachers, staff, administration, and students of all ages. Like your most seasoned teachers, we have seen and heard it all. Old building quirks? Check. Flexibility for STEAM classrooms? Check. Secured storage for records? Check. Thinking of something else? Check. We have ideas for everyone — from kids learning their ABCs to scheduling your bus routes.

We are ready to share our expertise and outside-the-box thinking with you to deliver made-to-order turnkey furniture solutions that are durable, attractive, functional, adaptable, and an exceptional investment of district funds. And with furniture built to the inch, tailored teacher desks, and a plethora of table shapes and options, you can test our ability to create learning and work spaces while enjoying the best furniture-purchasing experience in the industry.

We’ve been hitting the books for years in order to ace the challenge of making your job easier and your spaces better. We do whatever it takes to make sure your project goes as smoothly as possible — even if the design process starts with a sketch on a napkin. Like preparing for final exams, our design specialists will listen closely in order to understand the project’s needs and challenges. After developing a general layout, we then conduct an online design session with you. Furniture designs are refined and changed in real time — allowing each environment to become an effective and engaging solution tailored to its unique demands. Your furniture is then made in the USA, delivered and assembled by our professional installers, and backed by a limited lifetime warranty. We stand by our people and our products, and know that we will have earned an A+ for our final grade.

solutions that fit.
STEAM ENVIRONMENTS

Ready for bytes, bots, and brushes. You never know what activity might be going on in a STEAM classroom from day to day, which is why multipurpose furniture with mobility is imperative for teachers and students. Furniture needs to accommodate presentations, facilitate individual and team collaboration, provide flexible workstations, and withstand hard use for years to come.

Successful STEAM classrooms share these traits:
- Hands-on learning area
- Designated space for computers and equipment
- Lots of storage
- Mobile and reconfigurable furniture that adapts to lessons and activities
MEDIA CENTERS AND LEARNING COMMONS

A little bit of this. A little bit of that. A lot of potential. Traditional libraries at all levels of education have been given a 21st century makeover into multipurpose rooms where students have places to socialize, work independently, read books, create content, research online, hold a meeting, or have a class that harnesses technology in a STEAM or maker curriculum. These rooms, regardless of name, have this in common — they are where information, technology, and more traditional resources collide. They are textbook examples of “multipurpose”, meeting all the different demands of students and teachers with both flexible and task-specific furniture situated throughout the spaces.
CAREER & TECHNICAL EDUCATION

Specific answers to a wide range of needs. With increased access to cutting edge technology in K–12 schools, there are now countless fields of study beyond the traditional reading, writing, and arithmetic. However, high-tech fields like computer animation, CAD design, 3-D printing, architectural drafting, graphic design, and computer programming frequently require furniture capable of handling unique conditions. Adding to the challenge, each 21st century subject might have a different “must-have” feature — lab carts, chemical resistant worksurfaces, height-adjustable tables, or even drafting tables. This variability is not a trick question to Interior Concepts, since we tailor each furniture solution to the subject, teacher, and students’ requirements. We answer every question, including the extra credit ones.
HERE, THERE, AND EVERYWHERE. Tables are the Swiss Army knife in learning spaces. Easily moved, especially with casters, classrooms furnished with tables can have layouts reconfigured from lecture, to U-shaped, to small group quickly. Many tables that join together for collaborative work can also be separated for independent work and back again as lessons change, including many unique shapes beyond circle, square, or rectangular. When equipped with height-adjustability, shifting from seated to standing — and everything in between — tables can easily adapt to multiple age groups and curriculums. Markerboard tops enable group brainstorming and Motion Flip-Top tables are easily stored when fewer students are present. Power options also allow simple charging for tablets or laptops, and our EnerGEE! battery even provides all-day power without being connected to a building’s power supply. The options are indeed endless.
COMPUTER LABS

Click. Type. Learn. The role of computers in classrooms has evolved from basic keyboarding and accounting classes to technology-driven curriculum across all subject areas. With students employing robust software packages, these technology-rich computer labs require dedicated workstations designed to comfortably accommodate students and their CPUs, monitors, scanners, and printers. Since these courses are often in high demand, Interior Concepts has designed space-efficient workstations that smoothly integrate technology for the greatest number of students. IT departments also appreciate the Chase™ Wire Management System because of its ability to help simplify equipment connections and hide wires and cables. Optional workstation divider panels, built to the inch, also allow computer labs to meet rigorous testing specifications.
INSTRUCTOR DESKS & PLANNING ROOMS

Places to land and places to plan. Responding to the evolution of classrooms into high-tech and flexible learning spaces, instructor furniture has also changed to be more mobile, conducive to teacher/student interactions, and technology friendly. Some schools have even done away with a traditional permanent teacher desk in classrooms and instead have planning rooms where teachers can better coordinate lesson plans with their peers; equipped with just a podium, the classroom can then be shared by different teachers. Instructor furniture that satisfies varied needs, tastes, and teaching styles will be designed hand-in-hand with us to ensure that your instructors receive exactly what works best for their environments.
ADMINISTRATIVE & RECEPTION AREAS

Smart designs for front and back offices. From smiling faces that greet visitors to the IT department keeping the entire district humming, furniture for support staff encompasses a wide variety of needs. Sports coaches can plan game strategies in one large room, but guidance counselors discuss futures in private offices. Payroll departments require locking storage for human resource records and principals want seating for meetings with students or staff. There may not be a one-size fits all furniture solution, but with our wide variety of ergonomic desktops, storage components, image-enhancing finish options, to-the-inch construction, and designs tailored specifically to task requirements, we can provide staff with the right furniture and work tools that facilitate day-to-day productivity and increase job satisfaction. Our smart and tailored approach earns gold stars wherever we go.
OPTIONS AND ACCESSORIES

STORAGE
Bookcases, Media Cabinets, Pedestals, Wardrobe Cabinets

SEATING
Task, Guest, Multipurpose, Stools, Soft Seating

SPECIFICATIONS
- Workstations can be custom-designed and manufactured to very exact dimensions — any length, depth, or height — and different connectors allow for an almost infinite variety of configurations.
- At the heart of the Interior Concepts system is 1” square, 16-gauge steel tubing assembled using patented zinc-cast connectors with ABS plastic sleeves. The tubing frame is finished with epoxy powder coat paint.
- A patented panel-molding system holds panel inserts in place. This assembly technique allows for the easy removal and replacement of panel inserts without disturbing wires or cables and without requiring disassembly of the furniture.
- Worksurfaces are 1.25” thick and finished with a high-pressure wear-resistant laminate writing surface with a balancing laminate backer sheet on the underside of the worksurface.
- A broad palette of options exists for panels, laminate worksurfaces, and 3MM edges in solid colors, patterns, and wood grains, making it easy to maintain a consistent and coordinated look throughout your organization.

THE INTERIOR CONCEPTS PROCESS

LOOK through our product selection to find the design that will work for you. Contact us to start your project, and a project manager will contact you to discuss your needs and find the best furniture solution.

DESIGN YOUR FURNITURE LIVE. After our design expert works with you to define your needs, he or she will propose an initial furniture solution. Over a web conference, you will see how the furniture and layout will look in your space. Make live changes and select colors to see a visual of the final design of your furniture solution.

PLACE YOUR ORDER. Once you give the go-ahead on your design, the plans go directly to the factory floor and into production. After production, the furniture will ship to you, and our professional installers will assemble it on-site. Throughout each step, we will work with you to answer your questions and make sure you get your furniture when you want it.

AFTER THE INSTALLATION, your furniture will require little maintenance, since our system does not have end caps or loose pieces. Should you need it, your furniture is backed by a limited lifetime warranty. Plus, we keep a record of your furniture order on file, so future reconfigurations and additions are a breeze.

Limited Lifetime Warranty
