Higher education is not a one size fits all approach — and neither is the furniture or design. It goes without saying that today’s students and instructors require furniture that allows collaboration and looks professional. But facilities managers want solutions that can withstand years of use, look great, and maximize space available in both old and new buildings.

Interior Concepts delivers on all counts. Our furniture meets the demands of your students and staff. We specialize in educational furniture and have over 20 years experience delivering quality solutions in environments such as lecture halls, classrooms, instructor spaces, computer labs, and administrative areas — our furniture solutions are just plain smart.

Our Solutions:

- Bring your vision to life. By working together, we ensure that you receive exactly what works best for your environment.
- Create a professional look.
- Carry a Lifetime Warranty.
- Integrate power and data where needed.
- Conceal wires and cables, yet keep them easily accessible, with the Chase Wire Management System.
- Made-to-order furniture for maximum space utilization.
- We have people who will work with you on-site (measuring, reviewing plans, collaborating with staff), and we will make design changes with you live via interactive web conferencing.

“Interior Concepts was very positive when we would suggest a change to the furniture design. We could see the furniture through a 3D concept, which helped, and we would adapt the furniture to what we wanted after input from the teachers and administration.”

— Tracy Leiker, Associate Principal
