

## ELECTRONIC SIT-TO-STAND DESK OPTION

A great deal of research has been done about the ill effects of prolonged sitting. Research shows that those who sit for the most of their day are at greater risk for health problems, such as obesity, diabetes, and heart disease. The same research shows that even those who exercise daily are still at risk if they sit for the most of their day.

A standing desk is the best bet to offset the negative effects of sitting all day. With a click of a button go from sitting to standing, and back to sitting. Start taking a stand at work. Increase productivity, increase creativity, live longer, and work injury free.

### FEATURES

- Quick adjustment speed at 1.6 in/second
- Low 58 dB noise level
- Total adjustment range is 26in , adjusts from 25-51" high
- Designed and tested to support up to 264 lbs.
